

Asset Care

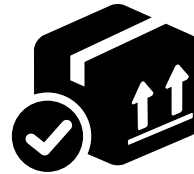

Proactive Blower Exchange Programs

Storeroom Program

The Asset Care **Storeroom Program** is designed to enable Proactive Maintenance (PM) on your JetAir systems to avoid unplanned downtime on your line. The Storeroom Program ensures that you always have blowers on hand to perform scheduled maintenance without relying on run-to-failure methods for these line-critical assets. The Storeroom program supplies you with an initial stock of blowers that are used to switch out the currently installed blowers based on a prescribed PM cycle. The removed blowers are returned to JetAir for reconditioning and concurrently JetAir sends you new blowers to replace the ones removed from stock.

- PM Cycles are determined by the L10 life-cycle of the motor bearings
- L10 life-cycle is based on an audit of the machine-runtime for each JetAir installation
- Requires an initial investment and a 3 year commitment billed in advance
- Initial quantity of blowers is supplied by JetAir to complete the first PM cycle
- JetAir replaces blowers removed from storeroom for each PM cycle

On Demand Program

The Asset Care **On Demand** program is designed to facilitate PM and avoid unplanned downtime for those customers who do not have extra storage, do not want to make an initial investment, or do not wish to make a three year commitment. JetAir will determine the PM cycle for each blower installation and will give you a courtesy service interval reminder prior to the end of each cycle. Upon confirmation of the end of the cycle, JetAir will ship you the required number of reconditioned blowers necessary to perform scheduled maintenance. Blowers removed from equipment at the end of the cycle are then returned to JetAir for reconditioning.

- PM Cycles are determined by the L10 life-cycle of motor bearings
- L10 life-cycle is based on an audit of the machine-runtime for each JetAir installation
- Only requires an annual commitment and no initial investment
- Blowers arrive just in time for scheduled maintenance
- Includes Courtesy Service Interval Reminders
